

UXCD DoR

Before sending to developers

- Partner with product designers to create the best user experience based on requirements
- Meet with product manager to review final content
- Meet with a developer to review accessibility (create a page to document markups in Figma)
- Meet with localization to review final content (create a page to document markups in Figma)
- Have at least 1 peer review final content in Figma
- Add a “Final” indicator to final content in Figma (must include content not in designs like error messages and empty states)
- A Jira ticket is created for resource keys for Localization using the naming convention for your product

*Reminder, these are guidelines (variations are acceptable) - use your best judgement.
